

ADD-A-STEP®

MODULAR MANHOLE LADDER SYSTEM

Availability

Available off the shelf for next day delivery in either Black (Storm water) or Yellow (Foul water) applications.

Modular construction

300mm sections allow for easy construction and adjustment on site.

Specification

BSEN14396 & SFA 7th edition compliant. Recommended for use by several UK Water Utilities.

WHAT IS ADD-A-STEP?

ADD-A-STEP is a modular alternative to traditional galvanised and stainless steel access ladders, fully compliant with BS EN 14396 & SFA 7th Edition.

Add-A-Step® System:

ADD-A-STEP® modular ladders are designed to allow easy access to chambers and are approved for use in potable water, waste water, highly corrosive and general construction applications. They are cheaper, safer and more user friendly alternative to traditional galvanised and stainless steel manhole ladders.
